1. Class/Seminar Teacher Evaluation

This survey requests your feedback on two separate aspects of your learning experience, split into three sections. The first section asks for your views on your teacher's class/seminar teaching. The second section asks for your views on the course as a whole at this point in time. Finally, the third section asks for some information about you, to aid analysis.

We recognise that this term has been particularly challenging for everyone due to the wider public health situation, with disruption experienced by both students and teaching staff. The School is continually striving to deliver the best possible educational experience despite these challenges and your views about your learning experience at LSE are a valuable source of information about this. The results will be used to help improve the teaching and learning experience for you and your peers and to identify good practice.

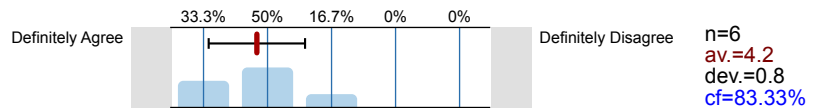

The School assumes that your response is broadly positive if you 'mostly agree' or 'definitely agree' with a statement.

- 1.1) Do the answers you supply below relate to the teacher from whom you have received the majority of your class/seminar teaching this term? The teacher's name, course title and group number (where relevant) are provided in the invitation email you have received for the survey.

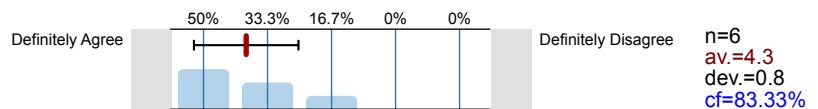

Please show the extent of your agreement by selecting the box that reflects your current view of your class/seminar teacher:

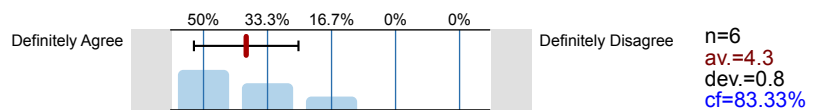

- 1.2) 1.1 The teacher communicated ideas and concepts effectively.

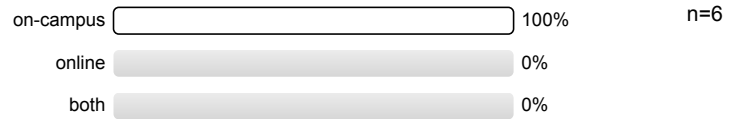

- 1.3) 1.2 The teacher has improved my understanding of the course content.

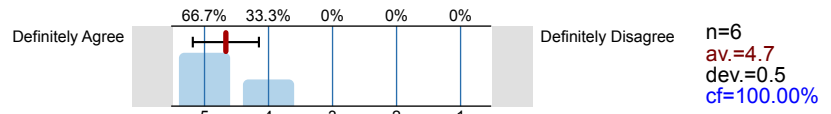

- 1.4) 1.3 The teacher has made the subject interesting.

1.5) 1.4 Have you attended classes/seminars for this class/seminar:

1.6) 1.4b The teacher is good at involving members of the class/seminar.

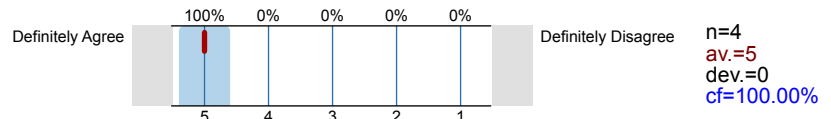

1.7) 1.5 Have you received feedback on your work from this teacher?

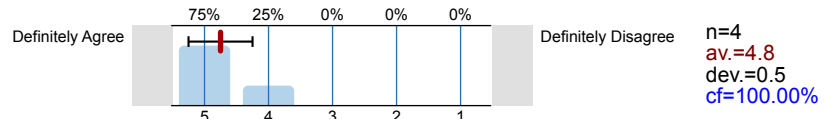

Please show the extent of your agreement by selecting the box that reflects your current view of your class/seminar teacher:

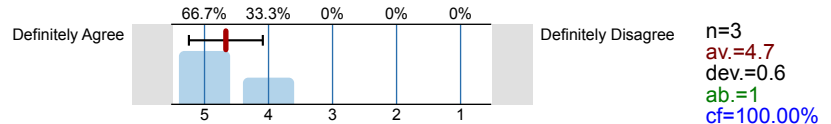

1.5b Feedback on my work has been timely (typically 3-4 weeks after submission).

1.5c I have received helpful comments on my work.

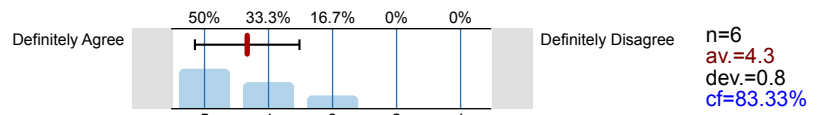

1.5d I was able to seek further clarification on feedback from the teacher where needed.

Please show the extent of your agreement by selecting the box that reflects your current view of your class/seminar teacher:

1.6 Overall, I am satisfied with the class/seminar teaching by this teacher on this course.

1.7 Please comment below on aspects of this teacher's class/seminar teaching you think were particularly helpful.

- - interactive classes
- patience when explaining
- good explaining
- Really energetic and positive.
- Regularly marking work well with detailed feedback

1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- I would have liked to solved the problems at a faster pace, to cover as many as possible from the PS
- Sometimes being less all over the place with more focused teaching content, as he sometimes goes off on a tangent and then it gets a bit confusing
- Somewhat scattered during the classes, often writes all over the board and it's a little bit hard to follow.

1.11) 1.6 Overall, I am satisfied with the class/seminar teaching by this teacher on this course.

1.12) 1.7 Please comment below on aspects of this teacher's class/seminar teaching you think were particularly helpful.

- - There isn't a question he hasn't answered, so he clearly knows his stuff very well; his office hours are amazing; he's funny.
- Goes into macroeconomic theory in immense and accurate detail. Explains the intuition of the methods he uses very well and is good at involving other members of the class.
- Going through concepts on the board before starting the problem sets
- He always makes sure everyone definitely understands the content before moving on.
- I appreciate how Francisco explains fundamental concepts behind each question
- I find it helpful to have a recap of the models taught in lectures and review of concepts.
- Very lively and engaging teacher who makes mathematical aspects of Macro digestible and easier to understand

1.13) 1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- - I have no problem with Francisco as a teacher, I think the problem lies mainly with the EC210 syllabus. In particular, how it's structured; the dullness of the lectures & lecture slides; and the difficult problem sets. However, I think the one thing that Francisco could improve on is to have a more organised and structured approach to our classes.
- I believe that if Francisco were to write a list of the contents he would like to cover, it would allow us to cover all of the material efficiently.
- Pace of lesson - sometime a bit fast or unable to cover the questions pertaining to that week

- Perhaps more timely structured. Not much of a problem because we normally run out of time to go through everything in depth so that we can understand everything,
- Sometimes we move slightly too quickly through mathematical models and don't get to cover all questions from problem sets - though this is more likely the result of lack of contact hours from the course
- To try and spend more time on the harder concepts/questions as we tend to run out of time for them and it feels quite rushed. Also would be good if you were able to cross reference with the answers provided by the lecturer as many times I find that the lecturer's wording in the answers can be quite confusing.
- Wish the pace of it was a bit slower, but I cannot fault it too much as the time period allocated is quite short so has to go through things in a much faster manner to cover what is needed.

- 3.4) 2.4 I am satisfied with the amount of contact time with teachers for this course.

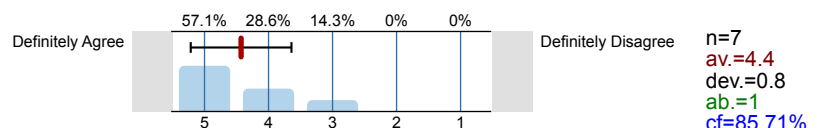

- 3.5) 2.4b Please comment below about why contact time with teachers has been less than satisfactory.

- Macroeconomics in this 2nd-year course is very theoretical and I believe more contact time will be beneficial as some students struggle to just independently understand these theories.

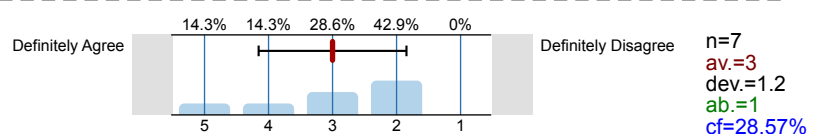

- We need more contact hours to go over problem sets and mathematical models which cannot all be covered in 1 hour

- 3.6) 2.5 I have been able to contact staff about this course when I needed to.

- 3.27) 2.16 Please comment below on aspects of this course you think were particularly good.

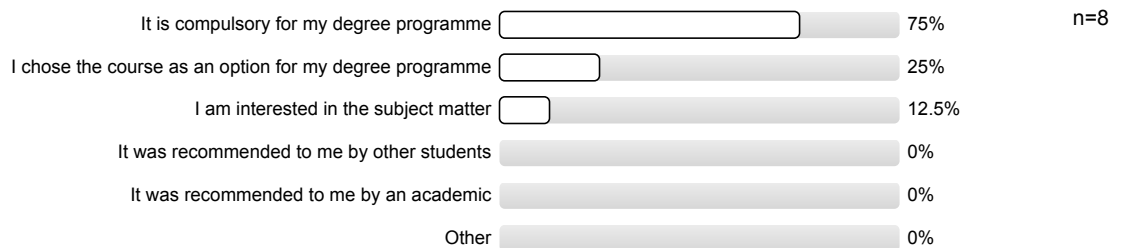

- -
- -
- Goes into much more depth than last years macro. It's the most stimulating course out of the 4 that I do and I enjoy the challenges.
The diagrams and intuition behind the theories and assumptions are interesting and can help me understand how it relates to real-world empirical data and situations.

- 3.28) 2.16b Please comment below on aspects of this course you think could be improved.

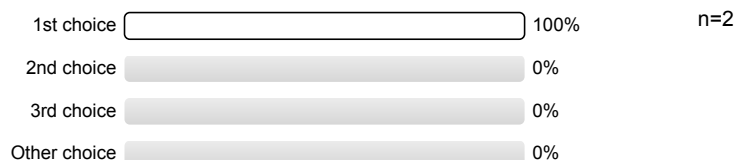

- -
 - Concepts related to the problem set are sometimes not covered in lectures. Would be better if the problem set was more tied to the lecture slides.
 - The lectures can feel very long as they tend to be quite content heavy so the deadline to hand in the problem set for sunday can feel too rushed. Would be a lot more useful if the deadline for the problem sets were a couple days later.
 - The slides for lectures could be laid out in a better fashion and assumptions could be grouped up instead of scattered around as they can confuse students.
- Also, the lecture recordings should be more interactive in my opinion. Moreover, 2h seminars would be perfect, good amount of time to cover the "covered in class" questions from the problem set as they tend to be more challenging than the "hand-in" questions, and we can also cover some of the theory that we may have struggled with from the lectures.

1.7 Please comment below on aspects of this teacher's class/seminar teaching you think were particularly helpful.

- Access to the teacher (in terms of additional office hours) is good.
- Class teacher is very interested in the course content itself so takes each question very seriously and attempts to go through it thoroughly.
- He takes time to address any questions we have thoroughly and doesn't mind staying behind to answer our questions sometime.
- Manuel is probably one of the best economics teachers I have had at LSE as he explains the problems sets really clearly and in depth.
- Use of the whiteboard to show diagrams and equations has been very helpful.

1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- NIL
- Perhaps have a summary of key points in note form so class has access at later date too.
- Sometimes, stuff on the board is left on from the previous class, and it can seem a bit overwhelming and difficult to follow.

Please show the extent of your agreement by selecting the box that reflects your current view of your class/seminar teacher:

1.11) 1.6 Overall, I am satisfied with the class/seminar teaching by this teacher on this course.

1.12) 1.7 Please comment below on aspects of this teacher's class/seminar teaching you think were particularly helpful.

- Going through models before we start looking at the questions.
- Recap of concepts at the start of the class
- Very good at communicating concepts and diagrams to us. Taking his time to make sure everyone understands and also linking it to how an exam question could come up on these certain topics and how to use the concepts to answer these questions.

1.13) 1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- Sometimes we don't go through everything as we end up spending too much time on certain parts that could have taken up less time. But also classes feel a bit short to just be 50-55 minutes long.
- Time allocation - He's very helpful but sometimes too much time spent on answering irrelevant questions.
- When giving feedback on problem sets, it would be good if you could mention places we could improve on/ correct our mistakes or misunderstanding of concepts as currently the feedback given is only telling us the places where we have gained marks and got things correct. It's easier to reflect on and improve on things that we know we've made mistakes on. Also in class, it would be more useful if we weren't split into groups to discuss as i feel that that way we end up losing some time, especially when we get confused with the questions. It would be easier if you explained the questions directly on the whiteboard rather than doing group presentation as it's the easiest way to communicate the ideas most effectively. Usually 'group presentation' gets quite confusing and hard to follow when we get things wrong.

- 3.4) 2.4 I am satisfied with the amount of contact time with teachers for this course.

- 3.5) 2.4b Please comment below about why contact time with teachers has been less than satisfactory.

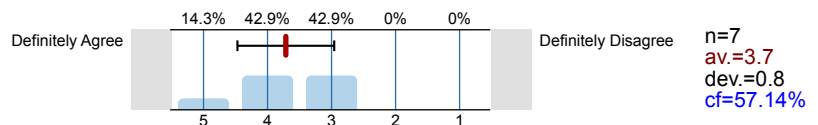

■ For this EC210 course, there is a lot of room for discussion and quite a lot of content thrown at us with many different concepts and diagrams. It is also a much more challenging course compared to EC last year, so I feel like an extra hour of contact time would have been perfect in my opinion.

- 3.6) 2.5 I have been able to contact staff about this course when I needed to.

3.26) 2.15 Would you recommend this course to other students?

3.27) 2.16 Please comment below on aspects of this course you think were particularly good.

- A very interesting course that is intellectually stimulating. The content is really intense and hard, but that also makes it quite an enjoyable course. Moreover, this course is really applicable to the real world and helps us understand the macroeconomy at a much deeper level.
- Pooling teacher's office hours together so that we can attend one that is most suitable for us.
- Teaching of material is kept updated, e.g. with modern monetary policy

3.28) 2.16b Please comment below on aspects of this course you think could be improved.

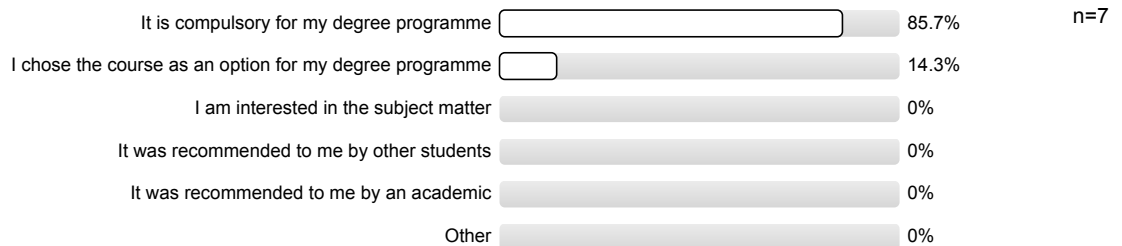

- Contact time with teachers and the marking is very inconsistent in my opinion. After getting my Jan results back and speaking to other students that also do EC210 and compared our submitted papers, to my surprise we actually had very similar mathematical derivations that ended up with the same conclusions for most of Section B yet they ended up getting significantly more mark than I did which is quite frustrating in hindsight.

Nevertheless, I feel like an extra hour of EC210 contact would be perfect.

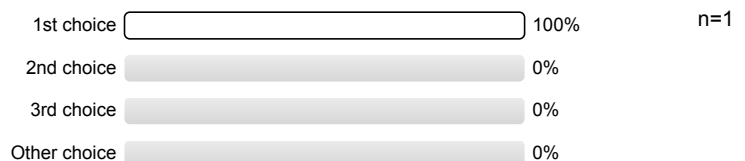

- Linkage to historical examples. Slides sometimes do not convey essential information concisely and problem sets questions are difficult to link to material covered.
- More guidance on exemplar answers for the exam.

1. Class/Seminar Teacher Evaluation

This survey requests your feedback on two separate aspects of your learning experience, split into three sections. The first section asks for your views on your teacher's class/seminar teaching. The second section asks for your views on the course as a whole at this point in time. Finally, the third section asks for some information about you, to aid analysis.
