1. was my teacher

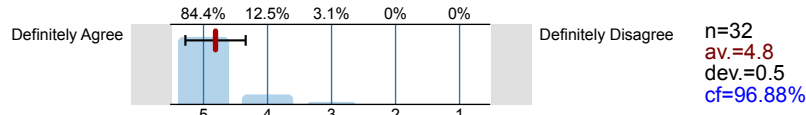

1.1)

1.2) The teacher communicated ideas and concepts effectively.

1.3) The feedback I received from this teacher has helped my learning and performance (select N/A if another teacher was responsible for providing you with feedback for this course)

1.4) Please comment on aspects of this teacher's teaching you think were particularly good.

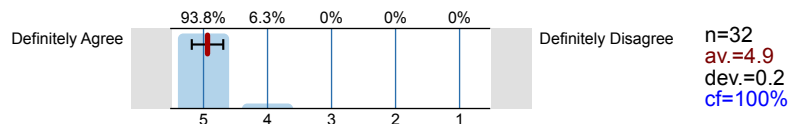

- Being able to explain complex concepts by breaking it down and making sure it is clear to understand; also ensures the classes are engaging.
- Clear explanation
Good time management
- Encourage students to participate during classes and answer problem set questions, and helped students to generally lead them to the correct answer, and also encouraged to understand the intuition behind questions and connect them with concepts learned during lectures.
- Engaging, intuitive explanations
- Enthusiastic, engaging, explains concepts very clearly, super helpful, great teacher!
- Explained concepts clearly.
- Francisco is very enthusiastic in his lessons and always very engaging (which is especially great considering he teaches 4 classes back-to-back!).
- Francisco was the person for me that saved this course from being a disaster. He is an excellent teacher with a clear understanding on how to teach economics. His math notes are simple, he creates interaction in classes and manages to go through the entire problem set every time.
- Genuinely a fantastic teacher who is able to explain at whatever level is necessary

- Goes over topics people dont understand.
- Good explanation
- Good explanations ! More detailed corrections would be super helpful !
- He explains everything really well and manages to cover most questions in the problem set
- He is amazing. Teaches each concept in detail and makes sure everyone is able to follow.
- Just extremely good at explaining the problem sets and concepts learned in class. 10/10
- Repeating concepts that might be confusing
Going over the concepts even if they were taught in the lecture
Not really not does he answer specific questions Uj the problem set but covers the whole sub topic and hence preparing us for other possible questions
Very helpful during office hours
- Super interactive and enthusiastic. Can tell that Manuel loves teaching and I feel great to learn from him
- very detailed, gives examples, goes through the maths well as well as the theory - one of my favourite teachers!
- Very engaging
Breaks down concepts well
- Very helpful and friendly

1.5) Please comment on aspects of this teacher's teaching you think could be improved.

- Focuses slightly too much on the basics for me, but that may just be to ensure all have a grasp of the basics
- maybe write the maths out on the board a little more often instead of pointing at it in the solutions?
- More detailed pset solutions
- n/a
- N/A
- N/A
- NA
- NIL
- nil.
- No comments here!
- None
- Nothing, he is really good.
- Though probably not that noticeable to others, Francisco often makes awkward examples. Without providing an example, I would advise him to think a bit more about these before saying them out loud. Personally, I frequently smile upon hearing them, but I do see how one could be offended.
Plus sometimes he uses exaggeration to get a point across but it is a bit too much. For example, when he emphasised that after the individuals are old, they die and are no more.

1.6) Overall, I am satisfied with the teaching by this teacher on the course.

1. was my teacher

1.1)

1.2) The teacher communicated ideas and concepts effectively.

1.3) The feedback I received from this teacher has helped my learning and performance (select N/A if another teacher was responsible for providing you with feedback for this course)

1.4) Please comment on aspects of this teacher's teaching you think were particularly good.

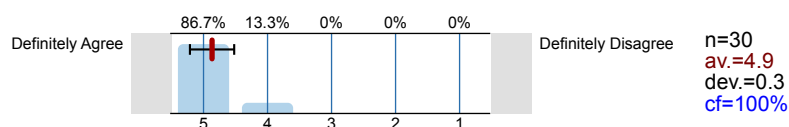

- Always good at contextualising the "big picture". Very direct and efficient, turning to nuances/rigour when needed.
- Clear explanation on chain of reasoning
- Effort is clearly put in to make the material understandable. Good balance of engagement and communication.
- Encourages students to participate during classes and encourages students to learn the intuition behind the concepts and not just memorizing the theories.
- Everything is good!! I really have loved being in his seminar and it has helped so much.
- Explains intubation very well.
- Francisco has made an honest improvement since last term. He has been explaining things more clearly and has cut back on edgy examples. He would definitely deserve the title "most improved"
- Francisco is a great teacher! He explains really well the concepts. His classes are great, I would not change a thing.
- Francisco is an amazing teacher, he explained concepts in a clear way and his classes were some of the most engaging I have had during my 3 years at LSE
- Francisco is an amazing teacher. I am always engaged and attentive in his class and he makes sure we understand all the concepts thoroughly before he moves on to the next. He teaches well and makes sure students are participating.

- great teacher
- He's a nice guy
- He is great at explaining concepts in detail.
- Really thorough explanations. Makes sure everyone understands
- Super helpful and always willing to explain further, very patient
- Very clear about concepts and things to look out for, engaging and interesting, great analogies to make concepts easy to understand
- Very clear explanations of concepts and the intuition behind.
- Very detailed explanations
- Very eager to teach
- Very thorough explanations of the problem sets

1.5) Please comment on aspects of this teacher's teaching you think could be improved.

- great
- He cut back on interaction with students. While true that many are inactive and do not do homework for class, those few that remain miss out on the opportunity to discuss, ask, and learn from interactivity.
- More office hours! He's truly a great teacher, and I would have liked more office hours.
- N/A
- N/A
- N/a
- Nil.
- None
- None.
- Not much tbf
- Overall pretty good, so nothing much really.
- Solutions provided in class could be more comprehensive
- The only thing is that it would be helpful to actually do the problem sets when we are in class rather than just going through his pre-made solutions. I attended some other seminars with other teachers when I was not able to make it to my normal one and I felt it was very helpful to go through it in real time because it helps us see the process.
- Wish the problem set correction were more detailed especially with math questions

1.6) Overall, I am satisfied with the teaching by this teacher on the course.
